Introduction

Kingfisher, as the name suggests, is an agile, flexible, aesthetic and customizable theme that can fuel the website. Its specialty lies in its neat and clean finish, simple navigation yet attractive layout. This theme offers three level mega menu, customizable product list and many more attractive— features to create a professional and highly robust website.

Benefits of Kingfisher Theme

- Go online with agile and responsive Kingfisher Odoo Ecommerce theme! Options are many, what matter is performance and features!
- Odoo Kingfisher Theme is The Perfect Theme for Ecommerce Stores!
- This feature packed theme is flexible enough to suit your unique needs.
- Easy Installation and Customization services to get a brand-new store effortlessly.
- Multiple snippets for easy customization of the store.
- It is a theme which lets you build and design your ecommerce store as per your needs.
- Make your ecommerce store more appealing by easy configurations.

Prerequisites

Following points must be followed before starting the plug-in installation:

- You should login as an Admin in Odoo.
- Check that your Odoo Instance is compatible for Kingfisher Theme. An e-commerce module should be present in your instance to use this app.

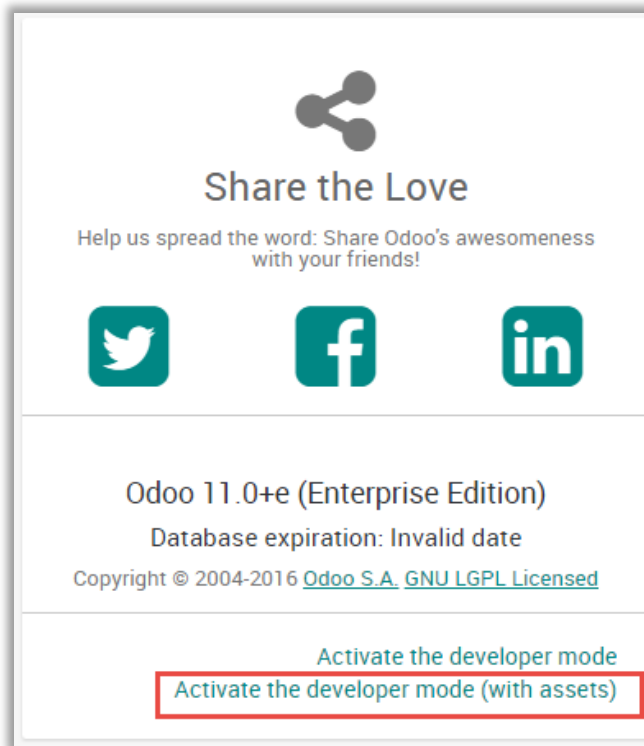

Note: Kingfisher Theme v11's all new features are not available in v8, v9 and v10.

Installation & Configuration

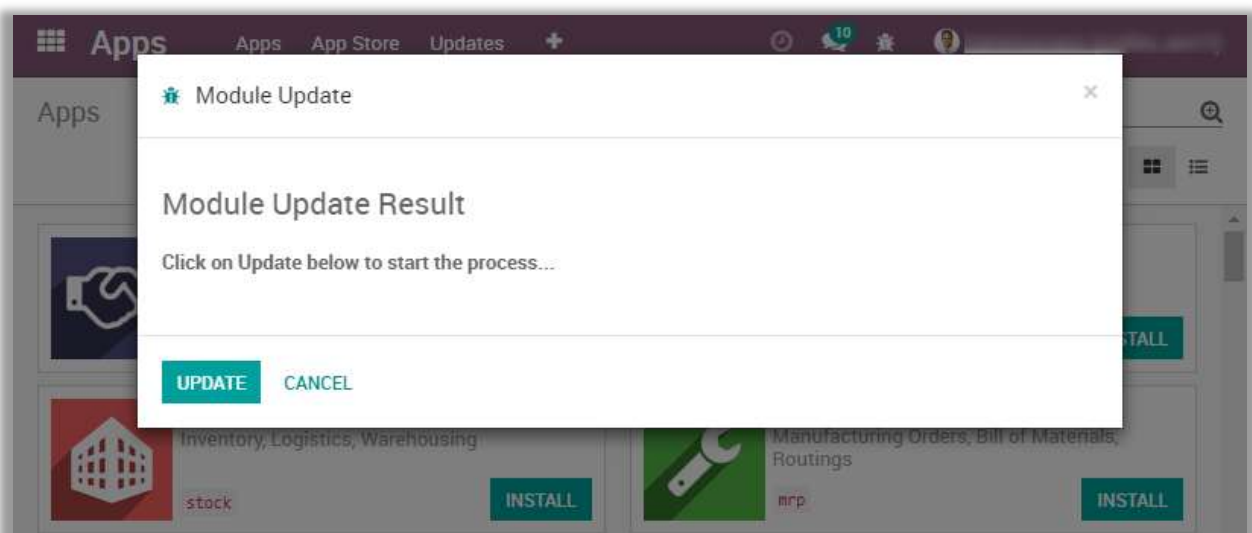

Installation Steps

- Download & Unzip Kingfisher Theme Folder
- Move kingfisher folder to your Odoo 10 setup path
Ex. /home/detai/odoo_demo/odoo/addons
- Open your Odoo 10 copy in any browser.
- Database selection:
 - **For New database**
 - Click on manage databases
 - Click on **'Create'** database (new database)
 - Enter database name, email & password for new database.
 - Click on **'Continue'** button
 - **For existing database**
 - Select existing database. Use default created db: "test_db_theme"
- Login with the admin credentials.

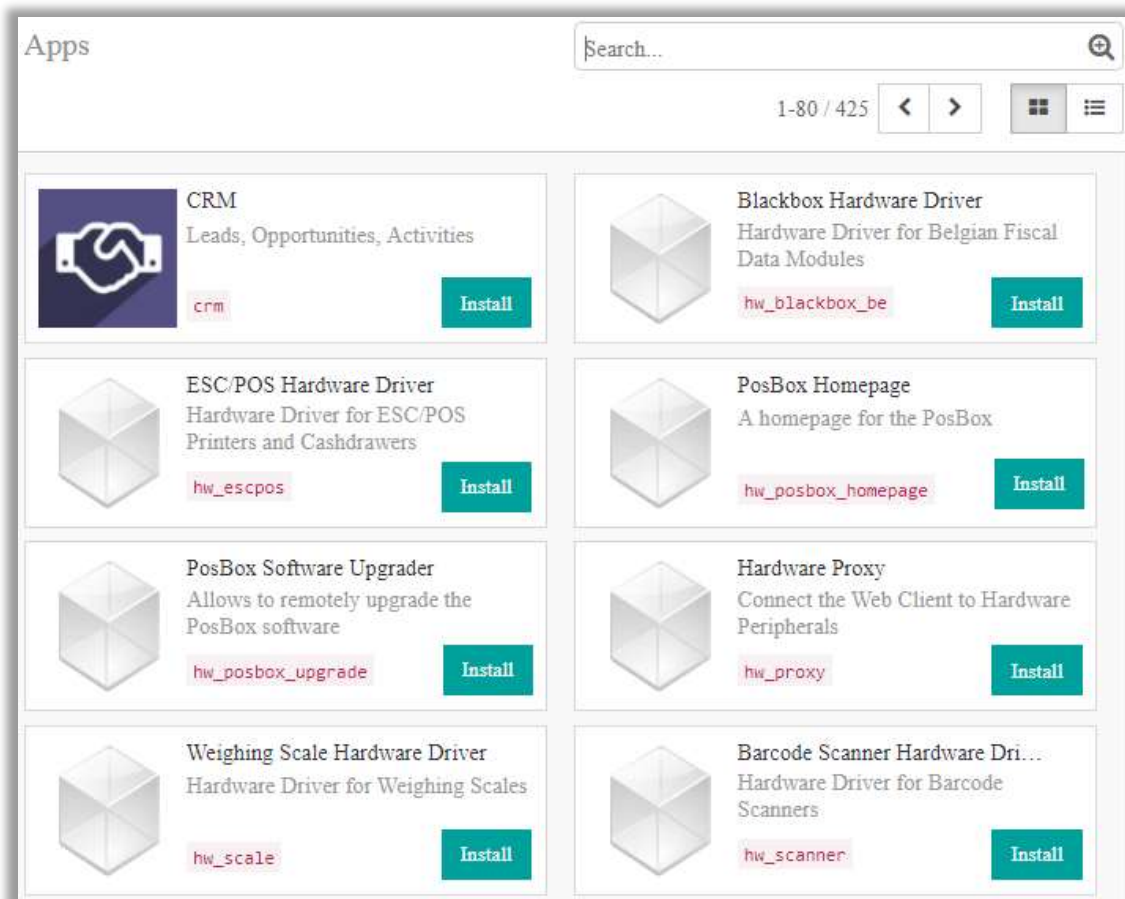

- Activate the Developer Mode
 - To activate Developer Mode, Go to **Settings -> Activate the developer mode (with assets)**. Click on '**Activate the developer mode (with assets)**' and developer mode will be activated.

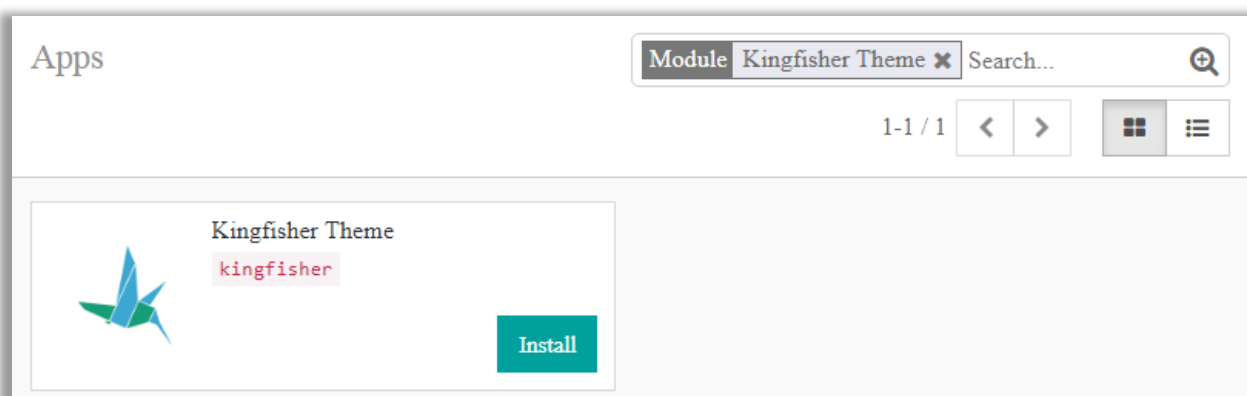

- Go to Apps/Update Module List.
 - Click on '**Update**' button.

- Go to Apps/Apps Modules
 - Remove search filter

- Enter module name in the search box provided in the top right corner of the page. For e.g. here write "Kingfisher".
- Click on 'Install' button.

Access Rights Management

- Now after installing the theme, to manage the access rights of users go to **Settings -> Manage access rights**.
- By clicking on it you will be redirected to the Users module. Thereafter navigate to the detail page of the particular user for which you want to manage the access rights.
- Now under '**Access Rights**' tab from '**Website**' dropdown list select the '**Editor and Designer**' option to let the particular user modify the '**Slider Configurations**', '**Product Tags**' and '**Product Multiple Images**'.

The screenshot shows the user management interface for a user named Mike. At the top, there is a breadcrumb trail: **Dashboard / Users / Mike**. Below this, there are two buttons: **SAVE** (highlighted in green) and **DISCARD**. To the right of these buttons is a pagination indicator: **2 / 2** with left and right arrow icons. The user's profile information is displayed in a form with two fields: **Name** (containing 'Mike') and **Email Address** (containing 'mike@appjetty.com'). To the right of the name field is a small profile picture of a man. Below the profile information, there are two tabs: **Access Rights** (active) and **Preferences**. Under the **Access Rights** tab, there is a section titled **Application Accesses**. This section contains a list of applications and their corresponding access levels, each with a dropdown arrow. The applications and their current access levels are: **Sales** (User: Own Documents Only), **Accounting & Finance** (Billing), **Employees** (empty), **Events** (User), **Mass Mailing** (empty), **Website** (Editor and Designer), and **Administration** (empty). The **Administration** dropdown menu is open, showing two options: **Restricted Editor** and **Editor and Designer** (highlighted in blue).

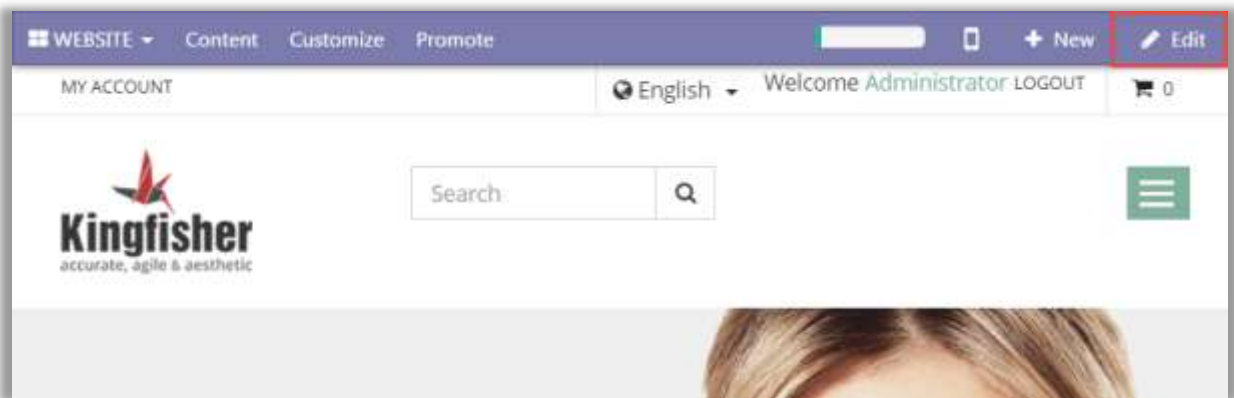

Application	Access Level
Sales	User: Own Documents Only
Accounting & Finance	Billing
Employees	
Events	User
Mass Mailing	
Website	Editor and Designer
Administration	Restricted Editor Editor and Designer

Note: If the '**Restricted Editor**' option is selected user won't be able to edit the '**Slider Configurations**', '**Product Tags**' and '**Product Multiple Images**' options.

Theme Configuration

Home Slider Snippet Configuration

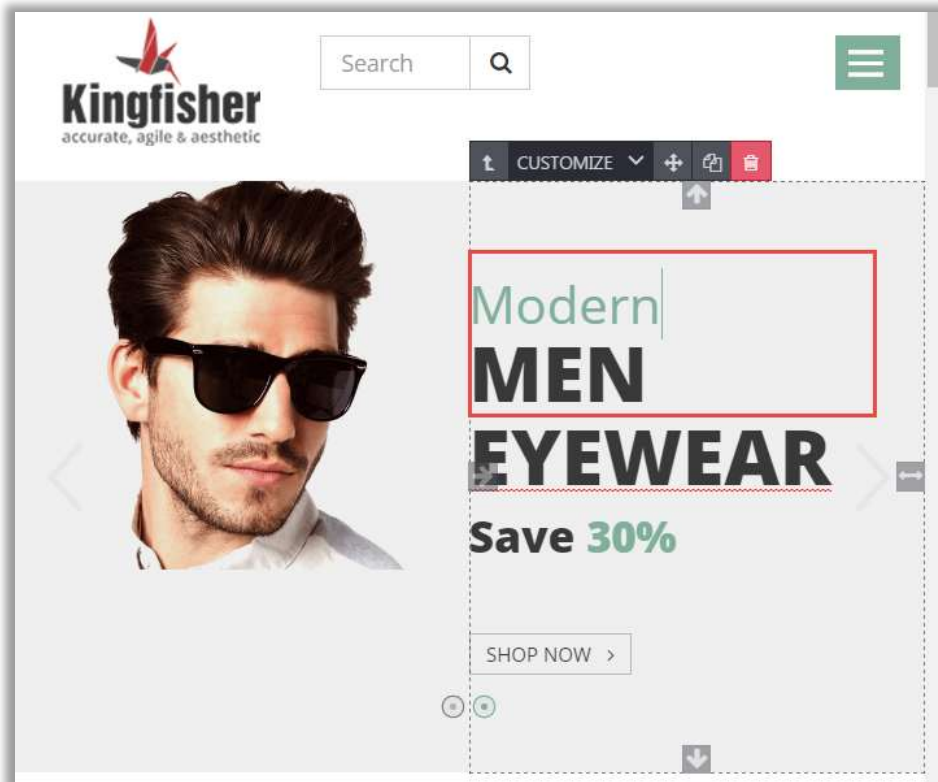

- Go to **Website** -> **Edit** -> **Add Blocks** -> **Features** -> **Home Slider**. Drag and drop Home Slider Snippet on the page where you want it.

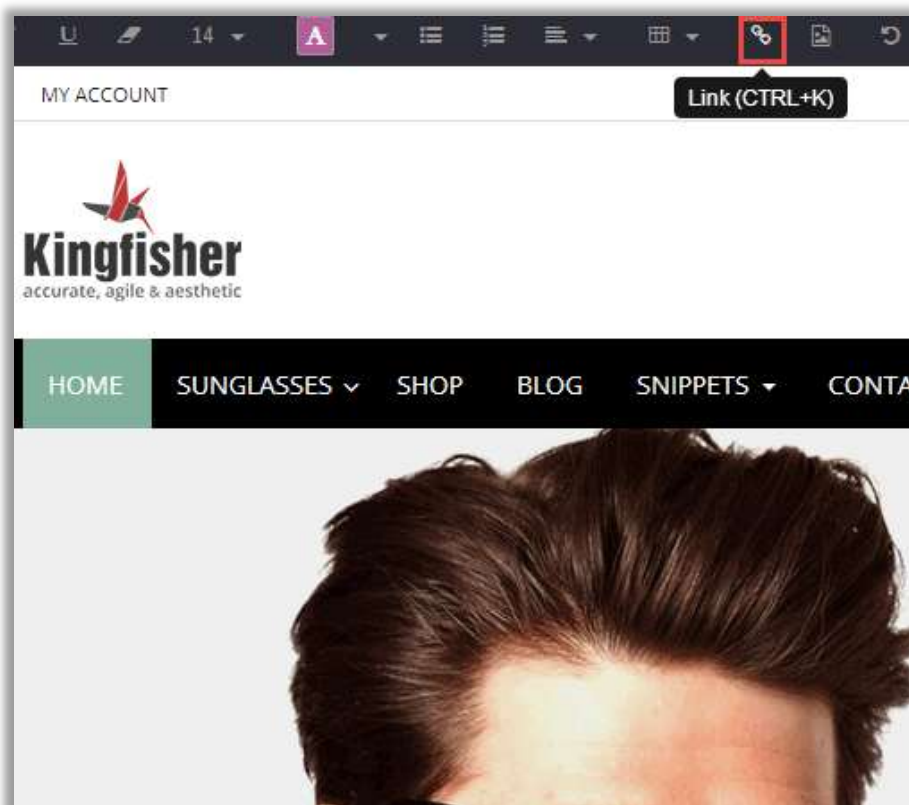

- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here.

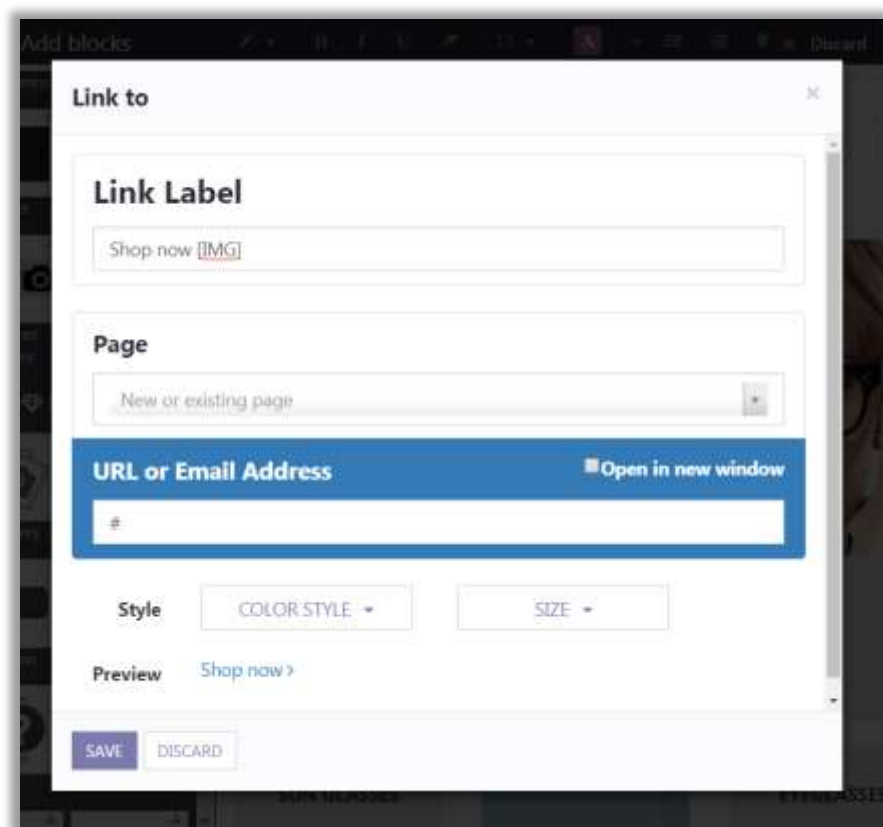

- Click on any text to change the text of the snippet and on the button to change the button text.

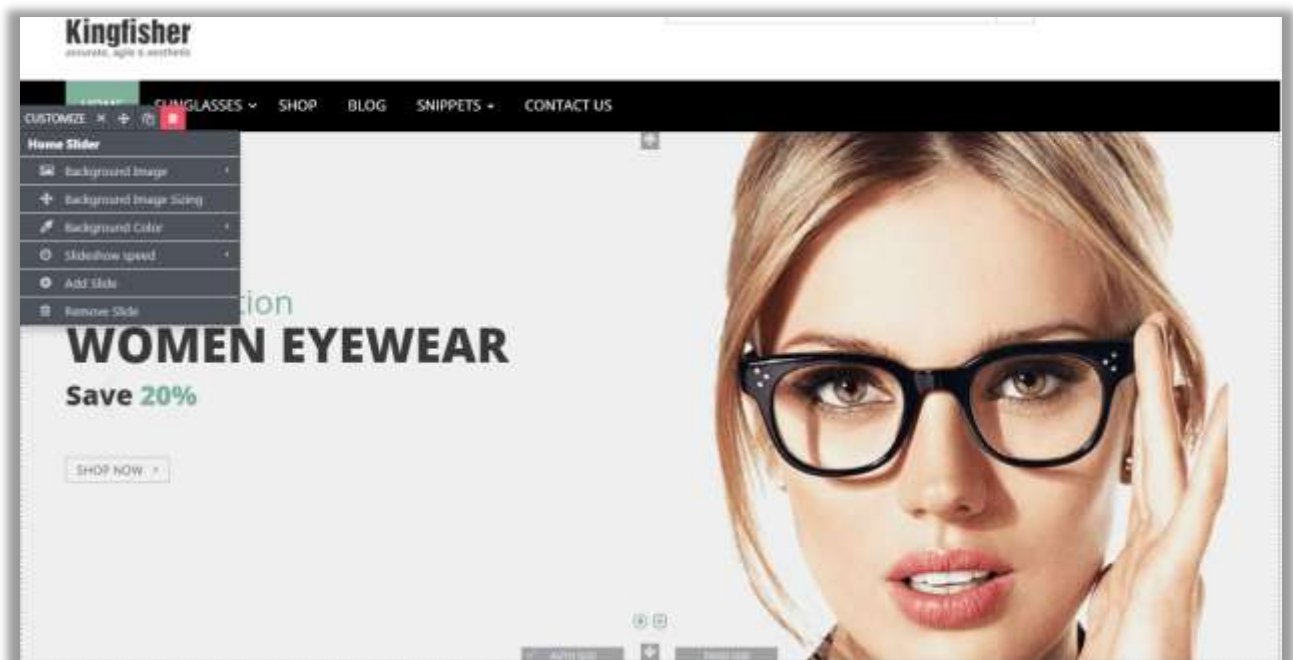

- To link the snippet to any page, click on the 'Link' icon.

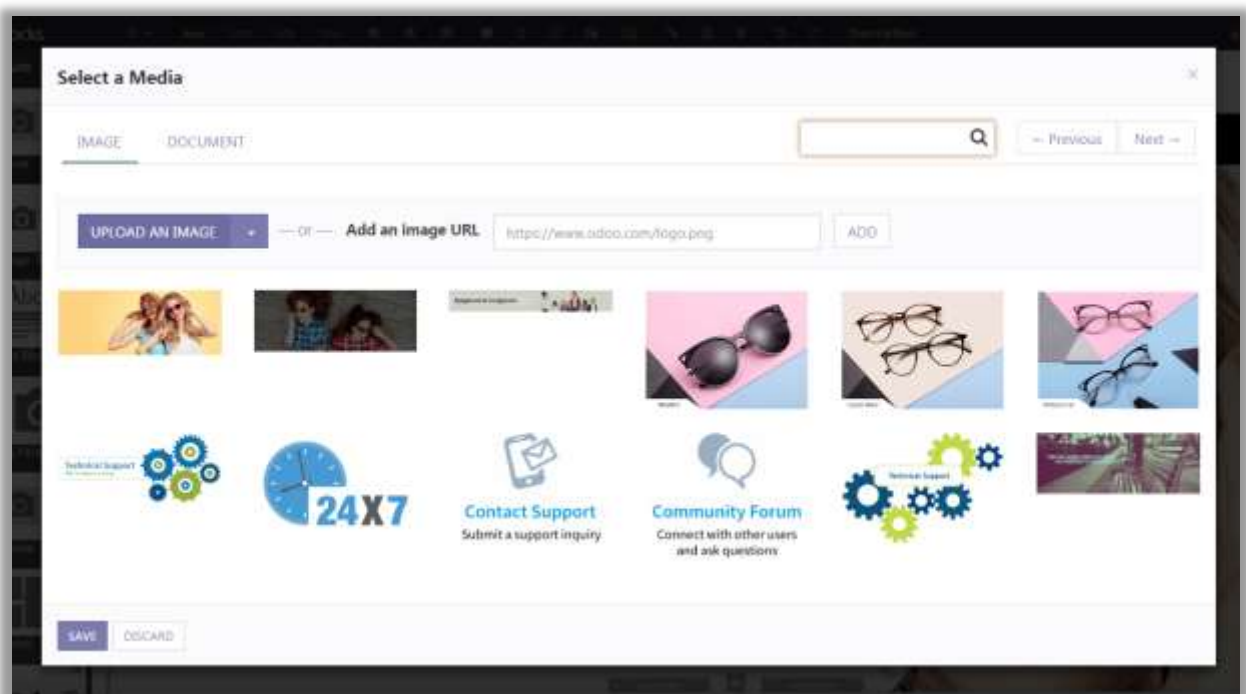

- Now enter the label for link in **'Link Label'** also select the page from the **'Page'** dropdown menu or enter the URL or email address lastly style the linked page as per the requirement.

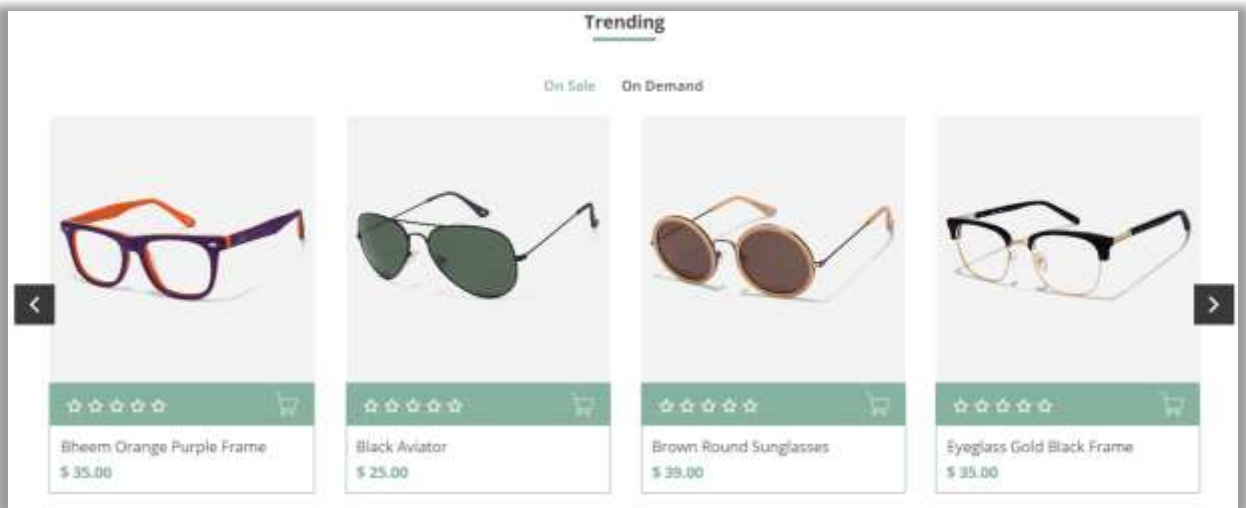

- Home Page Slider Image:

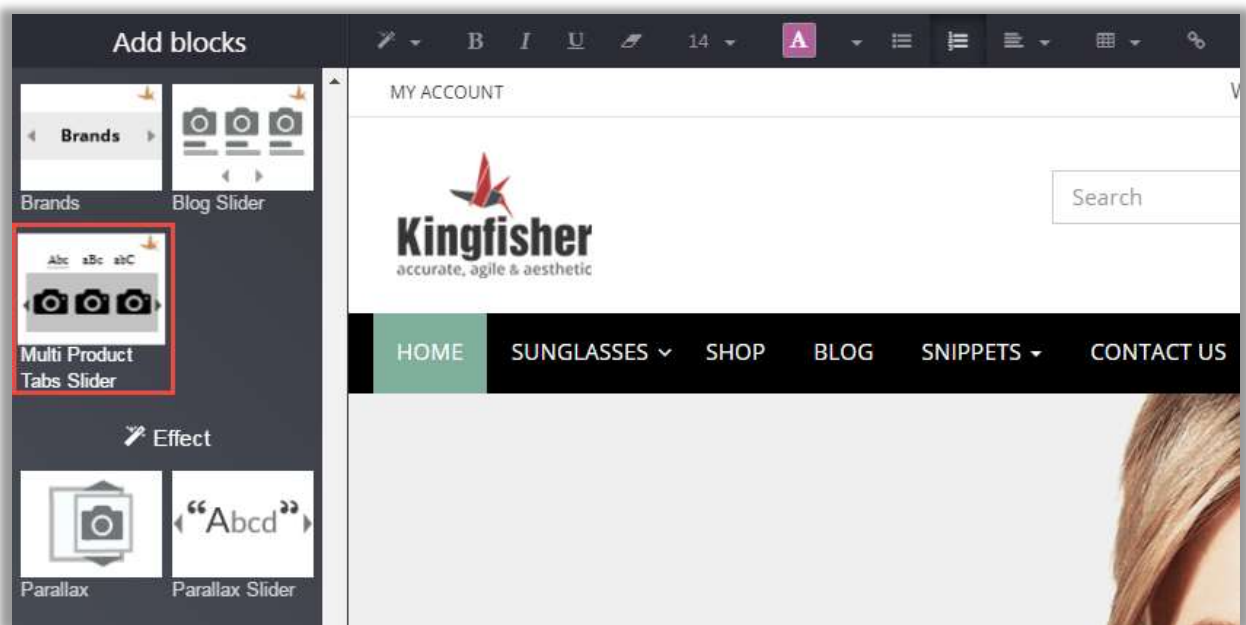

- Add / Update Image in “Homepage Slider”:
 - You can change images and other settings by clicking **‘Edit’** button.
 - Select the slider image and a pop up will appear. In Customize tab click on **‘Background Image’** which will open view as per above screenshot.
 - Select the image you want to set in slider or Upload the image or Add an image URL. And Click on **‘Add’** button.
 - Lastly click on **‘Save’** to save your final changes.

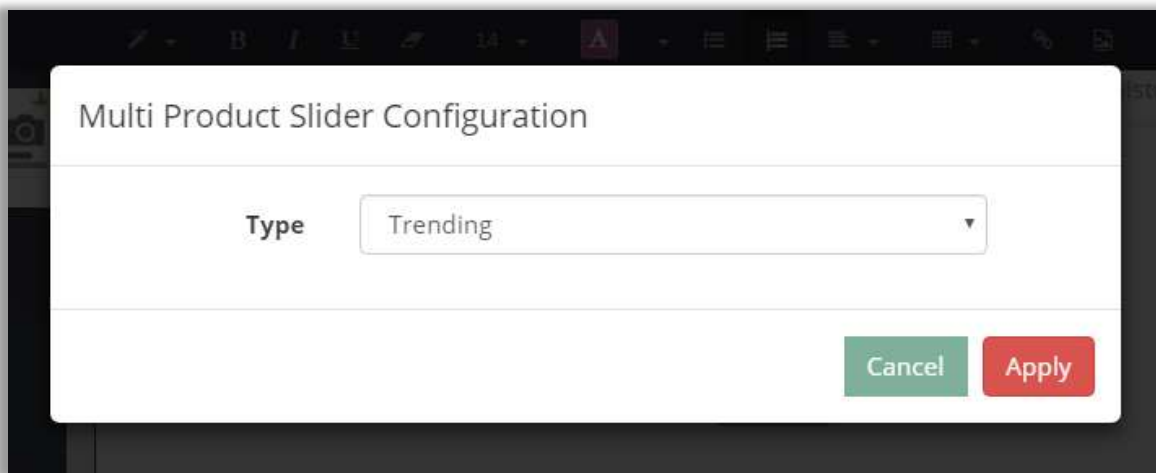

Multi Product Slider Snippet Configuration

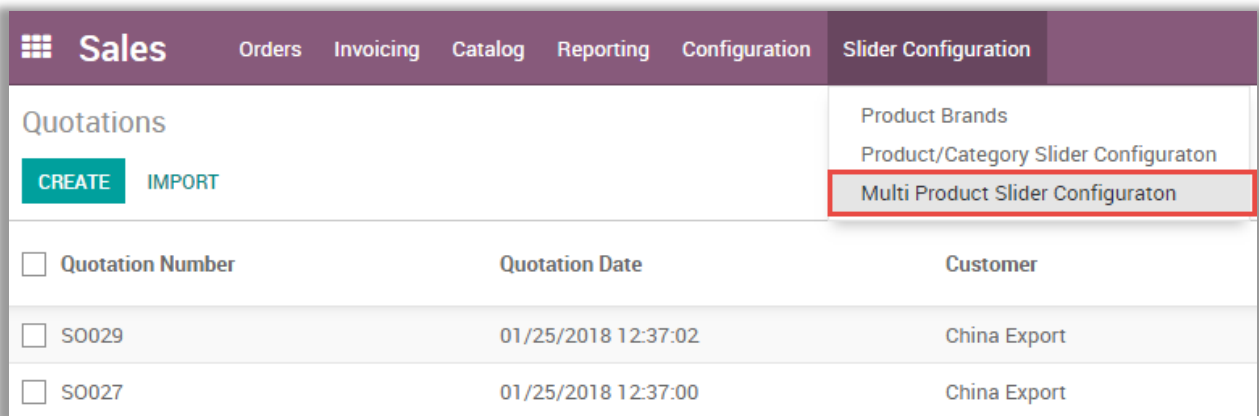

- Go to **Website -> Edit -> Add Blocks -> Features -> Multi Product Tabs Slider**. Drag and drop Multi Product Slider Snippet on the page where you want it.

- Select the Type of slider which you want to display on the page.

- Managing Slider Configurations:
 - Go to **Sales -> Slider Configuration -> Multi Product Slider Configuration**. Click on 'Create' button to create a new slider category.

- Set following attributes to display Multi Product Slider on website:
 - **Slider Name:** Enter the name of slider.
 - **Active:** Check the checkbox to activate the slider.
 - **No. Of collections to show:** Number of collections that are displayed on the page.
 - **Collection Name:** Enter the names of the collection to be displayed.
 - **Product Collection:** Set products which are to be displayed in the collection.
- Click on **'Save'** button to save the Multi Product Slider.

- To manage the Slider Configurations user must have the **'Editor and Designer'** access rights.
- You can add up to 5 collections in the slider.

Product Details Page Configuration

- Go to **Website -> Configuration -> Settings -> Multiple Product Image**. Now you can view following Multiple Product Image Settings:
 - **Slider Effect:** Check the checkbox to enable slider effects.
 - **Thumbnails Panel Position:** This drop down allows admin to select the position of Thumbnail panel from Left, Right or Bottom.
 - **Play Interval of Slideshow:** This allows admin to manage interval between two images in slideshow.
 - **Enable Text Panel:** Check the checkbox to show text along with images in panel.
 - **Thumbnail Overlay Effect:** This option allows admin to choose thumbnail overlay effects from Default, B/W, Sepia or Blur.
 - **Change Thumbnail Size:** Check the checkbox to change the size of thumbnail.
 - **Thumb height:** Enter the height of thumbnail.
 - **Thumb width:** Enter the width of thumbnail.

The screenshot shows the 'Settings' interface of the Odoo Kingfisher Theme. On the left is a dark sidebar with a menu containing: Sales, Website (highlighted), Invoicing, Email Marketing, Events, Employees, and General Settings. At the top of the main content area, there are 'SAVE' and 'DISCARD' buttons. Below them is the 'Multiple Product Image' configuration section. This section includes several settings: 'Slider effects' (checked), 'Enable the text panel' (checked), 'Thumbnails panel position' (set to 'Left'), 'Play interval of slideshow' (set to '5000'), 'Thumbnail overlay effects' (set to 'Default'), 'Change thumbnail size' (checked), 'Thumb height' (set to '50'), and 'Thumb width' (set to '88').

- **Add Multiple Images in Product**

- Go to **Sales -> Catalog -> Products**. Click on **'Product Multiple Images'** tab from product detail page.
- Click on **'Add an item'** option to start adding images for the product.
- To enable **'Multiple Product Images'** tab check the **'Add Multiple Images?'** checkbox.
- Multiple images will be displayed in the specified sort order set by admin.
- Product label will be shown when mouse over event will occur on multiple product image slider.
- It also provides facility to exclude specific product to display in product detail page on front-end.
- Product main image will be changed based on product variant.

Note: To add Multiple Product Images user must have the **'Editor and Designer'** access rights.

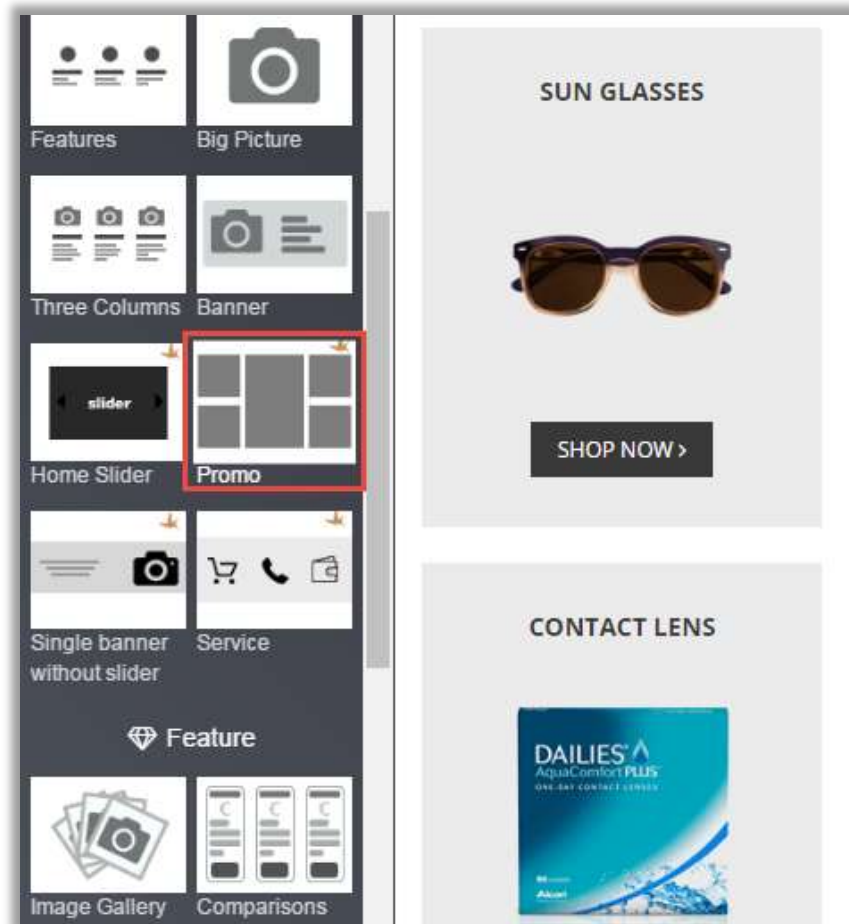

- **Display Multiple Images**

- You can display multiple images in “**Product Details page**” & “**Zooming**” feature.
- Display multiple images of product in responsive slider.
- By default first image of the slider will be product’s main image and other images will be displayed after that as added by admin.

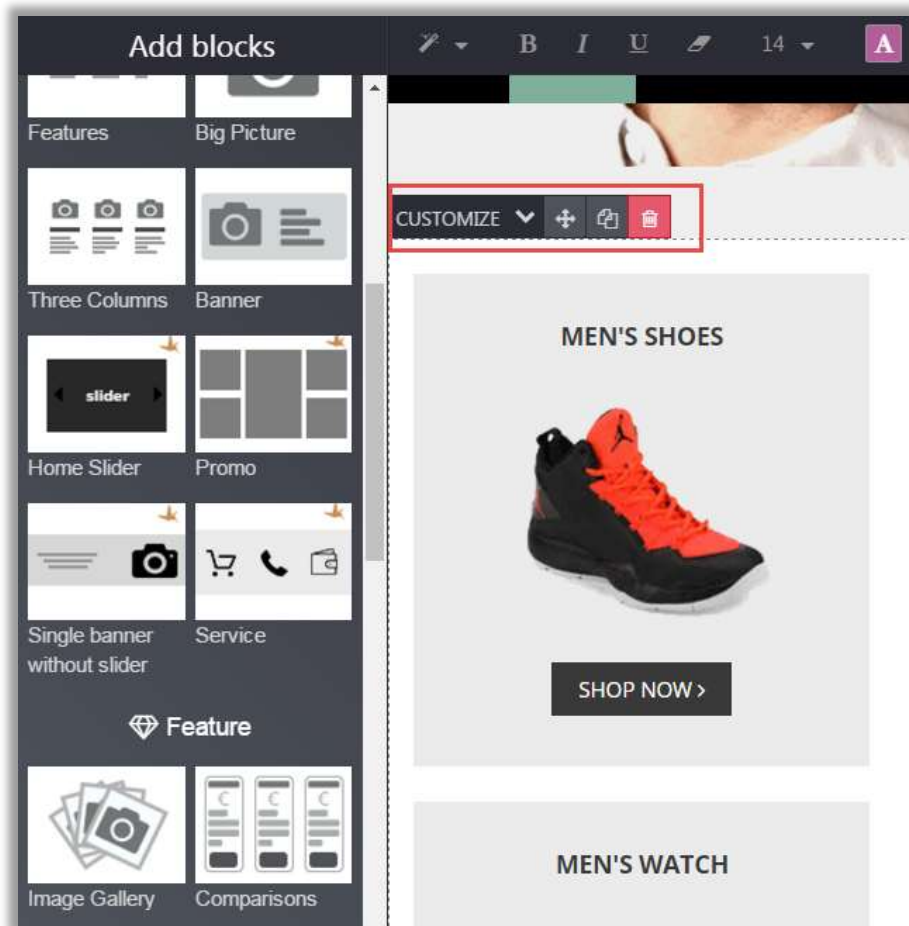

Promo Snippet Configuration

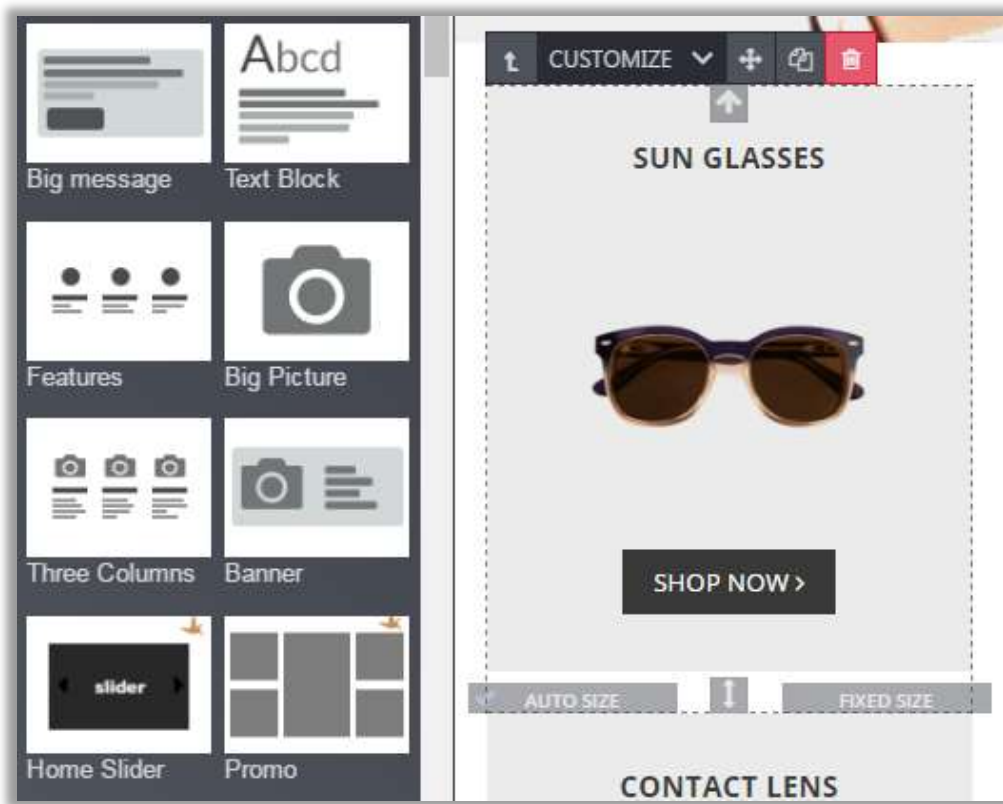

- Go to **Website -> Edit -> Add Blocks -> Features -> Promo**. Drag and drop Promo Snippet on the page where you want it.

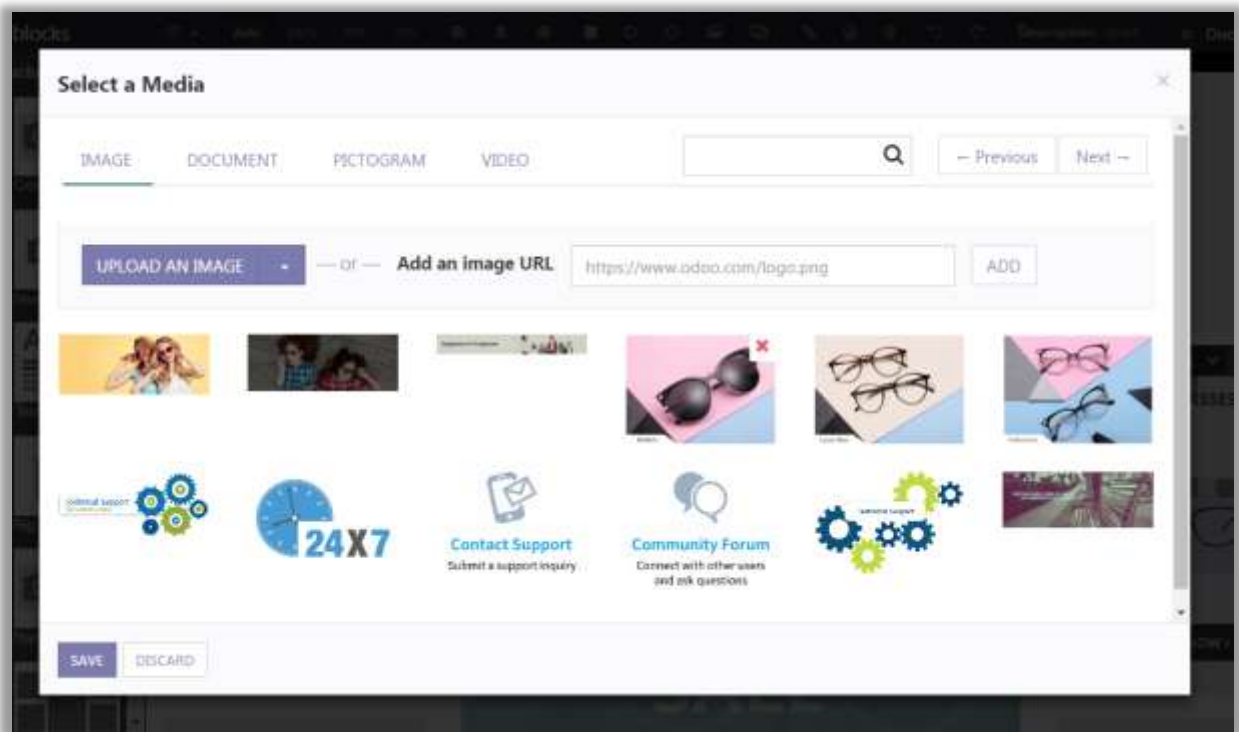

- Click on '**Customize**' to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here.

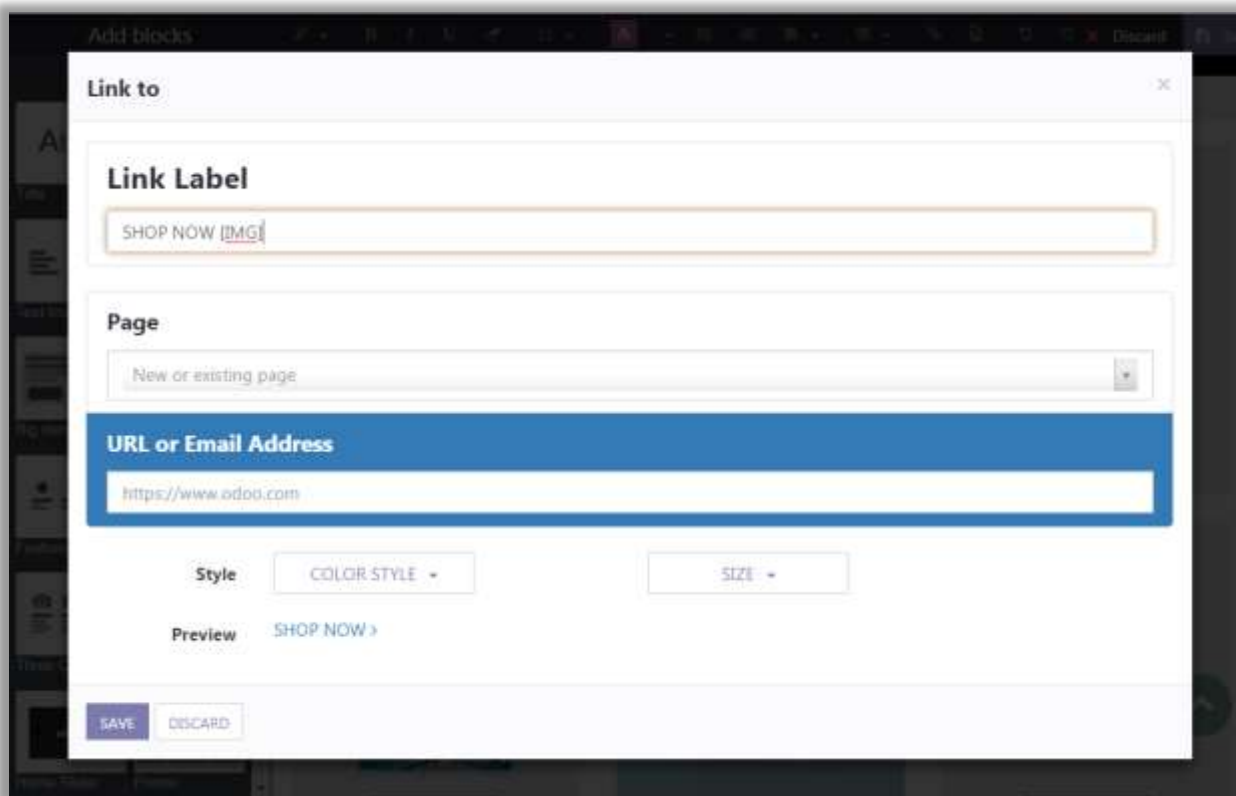

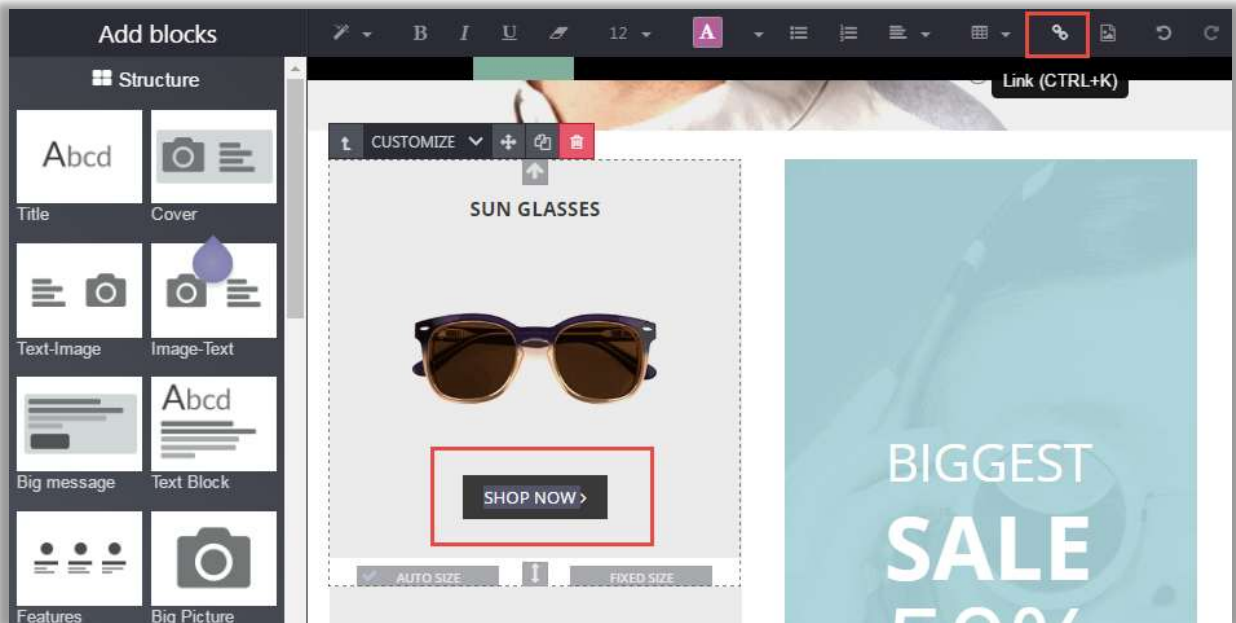

- **Promo Product Configurations:**
 - You can change the image, Image Style and also transform an Image.

- **Changing Image:**
 - You can add image from the computer or can also add image URL directly. You can also add Pictogram and Video in Promo Snippet.

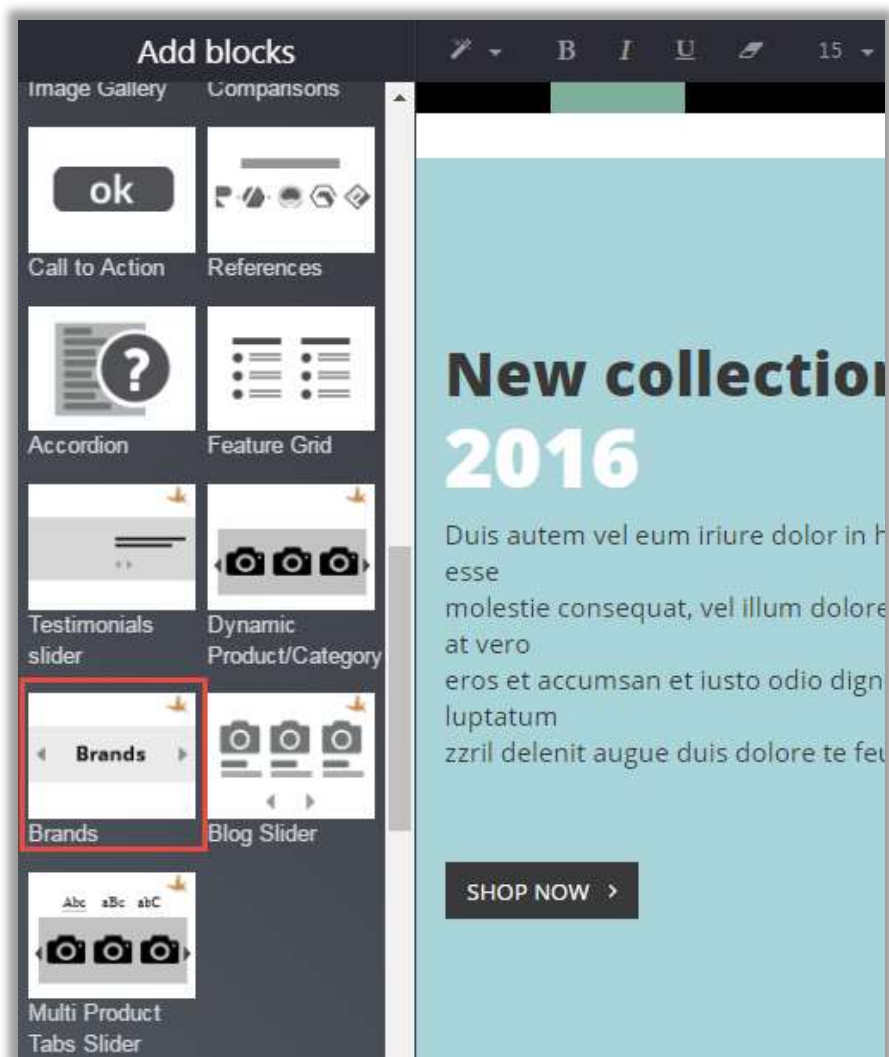

- **Changing Promo Texts:**
 - By clicking on promo text, you can edit the text. You can also Add URL, Link Text, Change Style of Text & change preview text.

Brands Snippet Configuration

- Go to **Website -> Edit -> Add Blocks -> Features -> Brands**. Drag and drop Brand Snippet on the page where you want it.

- Set 'Total Count' & 'Label' for the Brand Slider before adding it to the Website.

The image shows a 'Brands Slider Configuration' dialog box. It has two input fields: 'Total Count' with the placeholder text 'Enter Count' and 'Label' with the placeholder text 'Our Brands'. At the bottom right, there are two buttons: 'Cancel' (green) and 'Apply' (red).

- Adding Brands to Brands Snippet
 - Go to **Sales -> Slider Configuration -> Product Brands**. Click on 'Create' button to create a new Brand for the Shop.
 - Add Brand Name, Brand Logo, Brand Cover, Associated Brand Products and Brand Description saving the brand.

The image shows the 'Brands / Levis' configuration page in the Odoo interface. At the top, there are 'SAVE' and 'DISCARD' buttons, and a breadcrumb 'Brands / Levis'. Below this, there is a 'Brand Name' section with a small logo of 'LEVI STRAUSS & CO. QUALITY CLOTHING' and the text 'Levis'. To the right of the brand name, there is a 'Products' section with a '0' icon and the text 'Products'. Below the brand name, there is a 'Brand Cover' section with a large red Levi's logo. At the bottom, there is a 'Description' section with a rich text editor containing the text: 'Levi Strauss & Co. is a privately held American clothing company known worldwide for its Levi's brand of denim jeans.'

- To associate brand to the products, select any Product and add Brand Name to associate it.

Single Banner Without Slider Configuration

- Go to **Website -> Edit -> Add Blocks -> Features -> Single banner without slider**. Drag and drop Single Banner without Slider Snippet on the page where you want it.

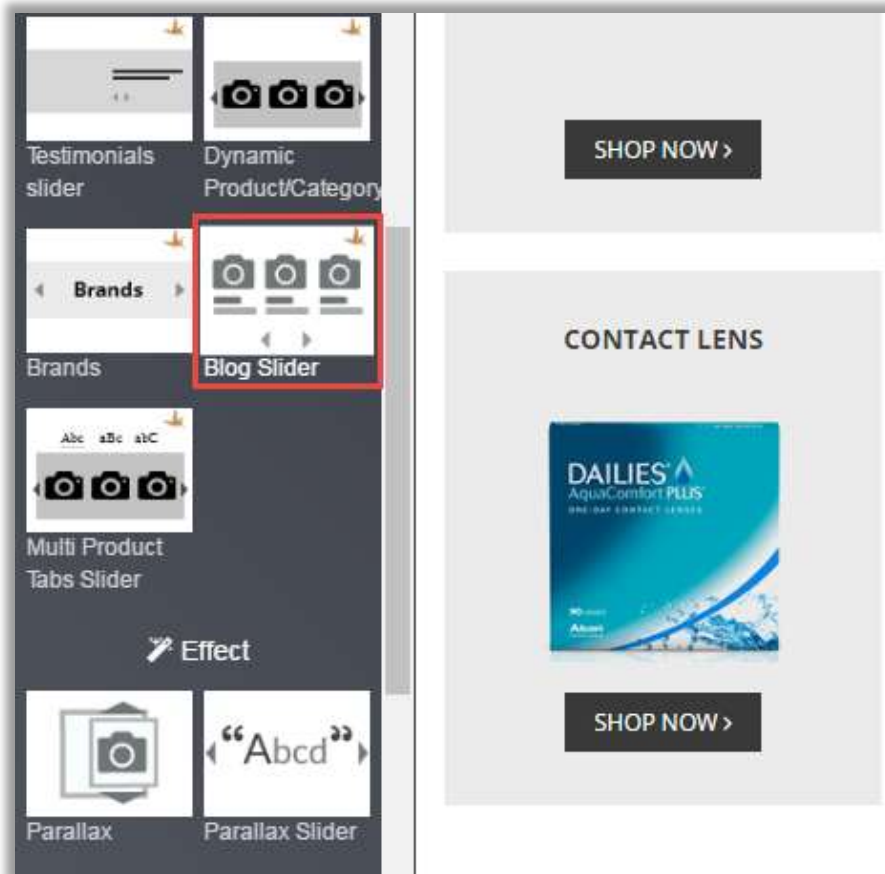

- Click on Image, Text and Button to change it as per your likings.

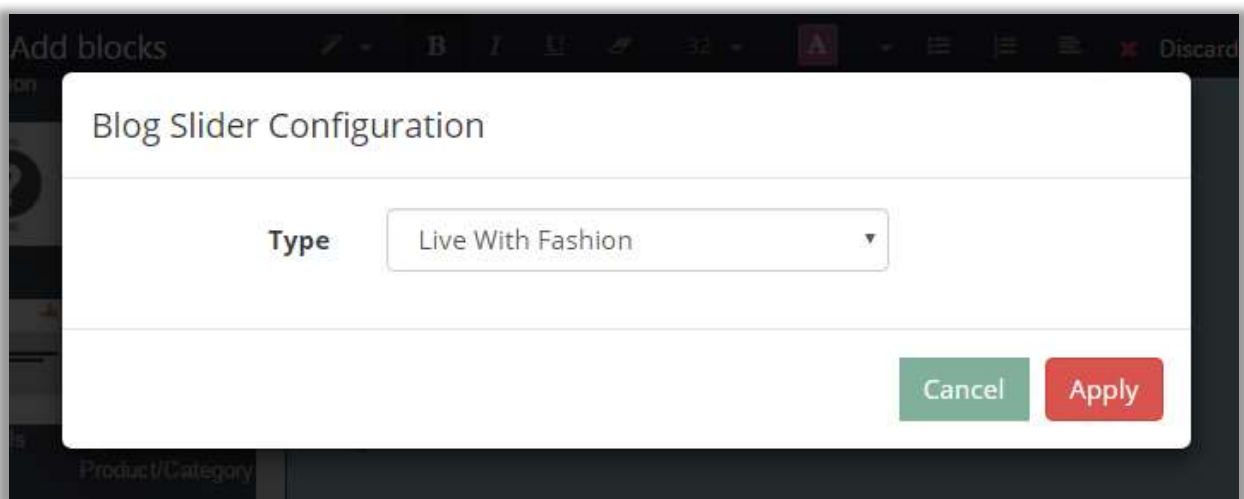

Blog Slider Snippet Configuration

- Go to **Website -> Edit -> Add Blocks -> Features -> Blog Slider**. Drag and drop Blog Slider Snippet on the page where you want it.

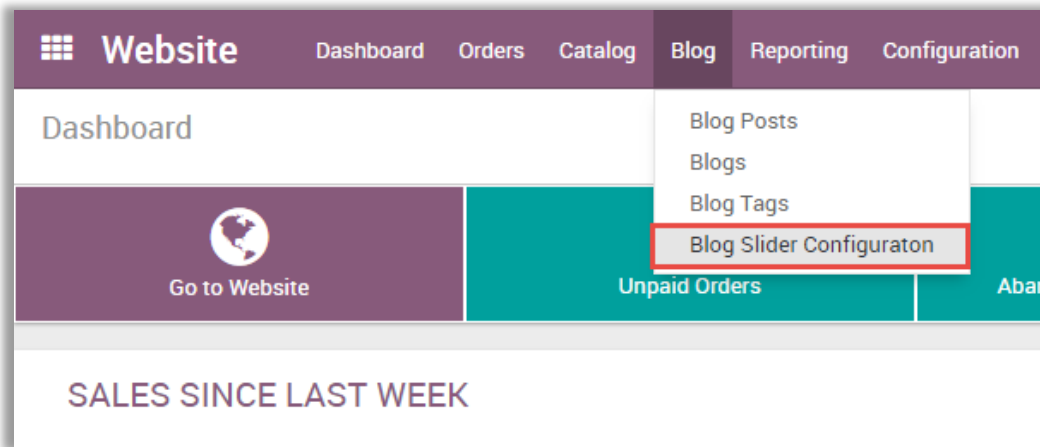

- Select the Type of Blog which you want to display from the menu.

- Adding Blogs to the Snippet

- Go to **Website -> Blog -> Blog Slider Configuration**. Click on **'Create'** button to create a new Blog category.

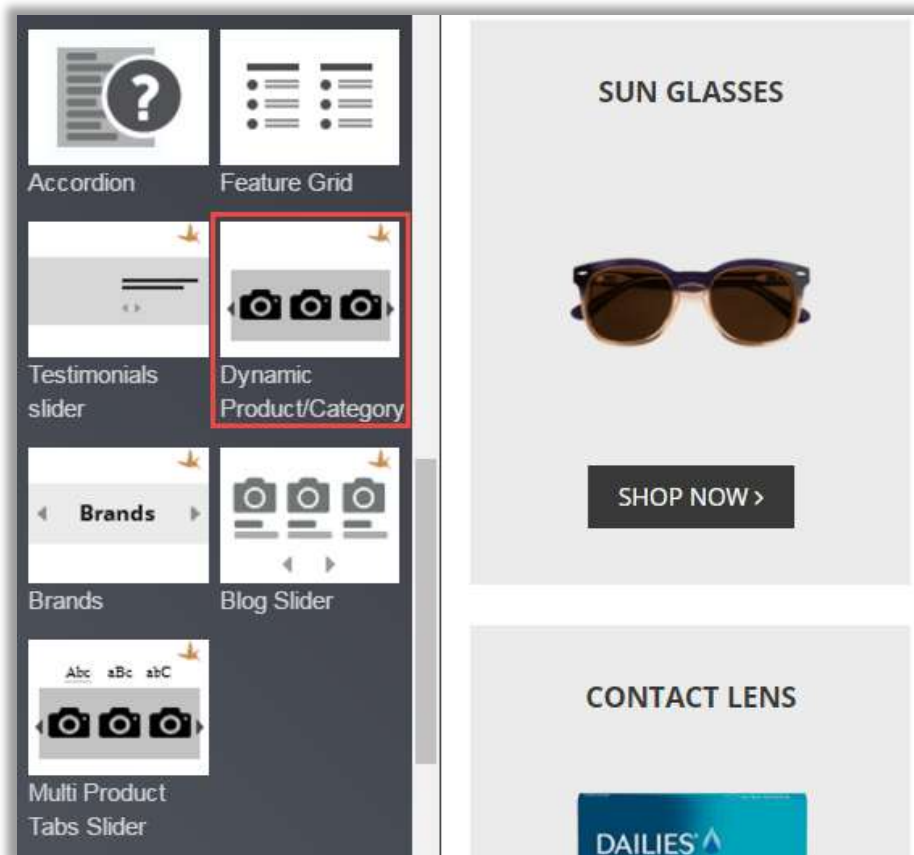

- Set following attributes to display Blog Slider on website:
 - **Slider Name:** Enter the name of slider.
 - **Active:** Check the checkbox to activate the slider.
 - **Count:** Set the number of blogs to be displayed in blog slider.
 - **Auto Rotate Slider:** Check the checkbox to set the slider on Auto Rotation.
 - **Slider Sliding Speed:** Enter the speed of slider if it is set on Auto Rotation.
 - **Collection of Blog Posts:** Add the Blogs which are needed to be added in the collection.
- Click on **'Save'** button to save the Product Slider.

The screenshot shows the 'Blog Post Slider / New' form. At the top, there are 'SAVE' and 'DISCARD' buttons. The form contains the following fields and values:

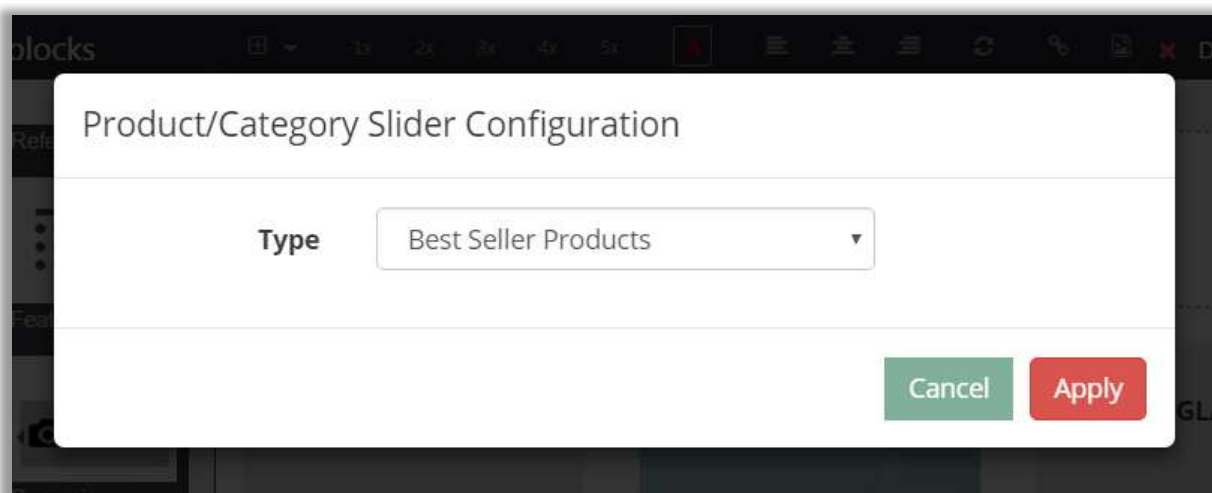

Slider name	Blogs
Active	<input checked="" type="checkbox"/>
Counts	3
Auto Rotate Slider	<input checked="" type="checkbox"/>
Slider sliding speed	5,000
Collections of blog posts	The Future of Emails x Integrating your CMS and E-Comm... x Features of Adidas Shoes x

Product/Category Slider Configuration

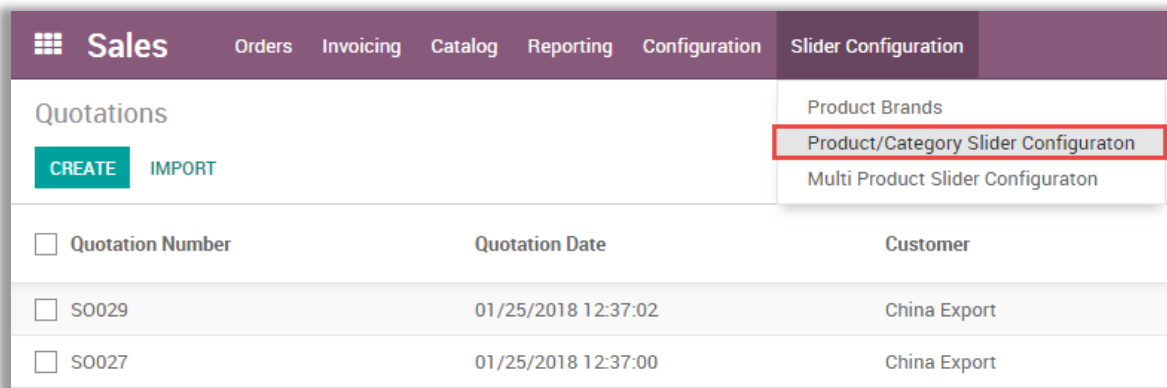

- Go to **Website -> Edit -> Add Blocks -> Features -> Dynamic Product/Category**. Drag and drop Dynamic Product/Category Snippet on the page where you want it.

- Select the Slider which you want to display on the page.

- Go to Sales -> Slider Configurations -> Product/Category Slider Configuration. Click on 'Create' button to create a new slider.

- Set Slider Name, Status, Counts, Type of Slider, Auto Rotate, Auto Rotate Speed & Collections of Product to be display in the Slider.

The screenshot shows the 'Product/Category Slider / New' form. The form has a title bar with 'SAVE' and 'DISCARD' buttons. The form fields are as follows:

Slider name	Trending
Active	<input checked="" type="checkbox"/>
Counts	4
Type of slider	Product
Auto Rotate Slider	<input checked="" type="checkbox"/>
Slider sliding speed	5,000
Collections of product	

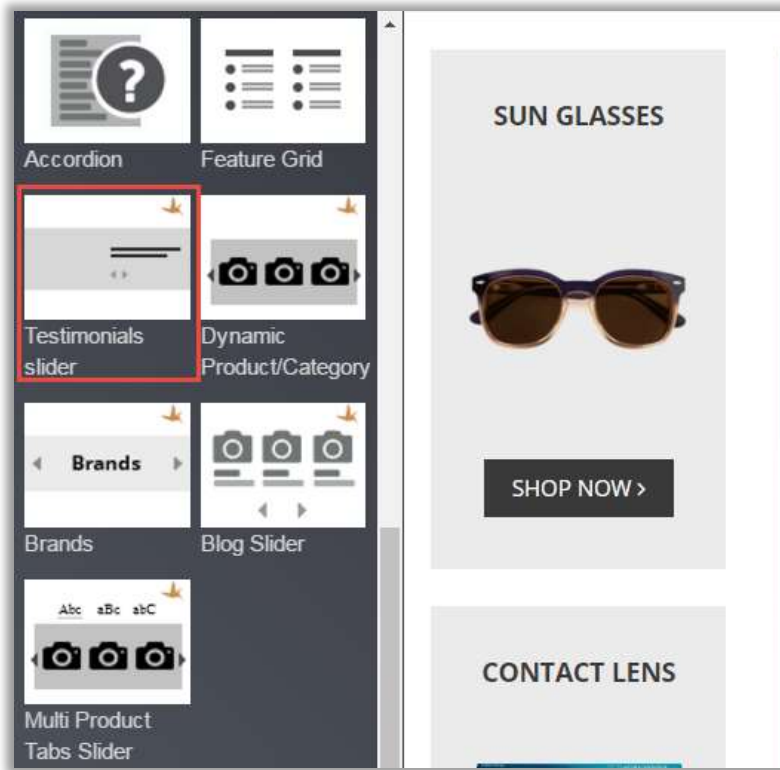

Note: To manage the Slider Configurations user must have the 'Editor and Designer' access rights.

- You can add up to 5 collections in the slider.

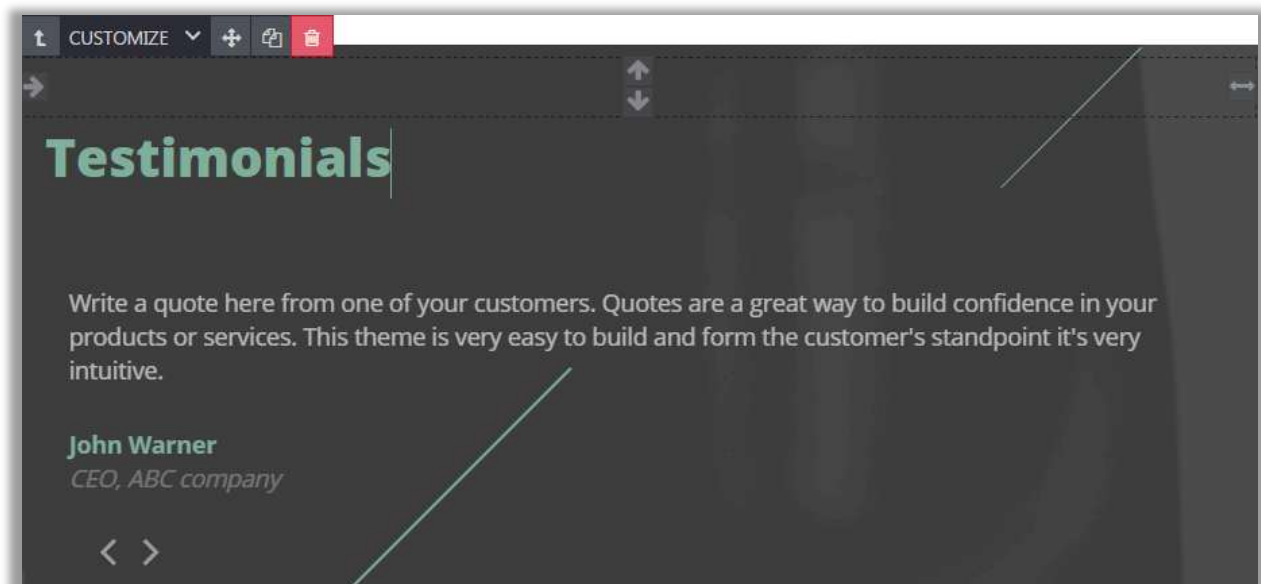

Testimonials Slider Snippet Configuration

- Go to **Website -> Edit -> Add Blocks -> Features -> Testimonials slider**. Drag and drop Testimonial Slider Snippet on the page where you want it.

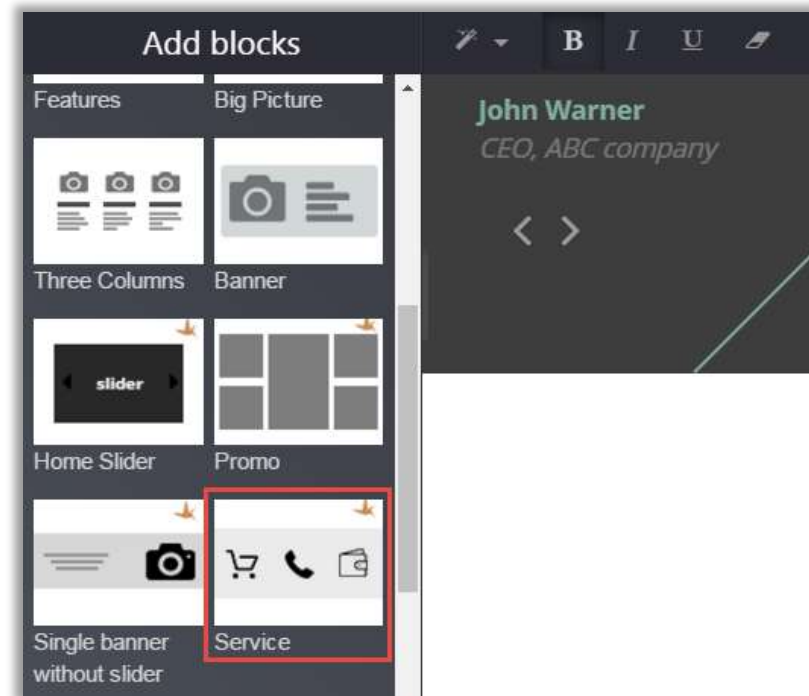

- Click on the text to edit it the way you want. Click on **'Customize'** to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here.

Service Snippet Configuration

- Go to **Website -> Edit -> Add Blocks -> Features -> Service**. Drag and drop Service Snippet on the page where you want it.

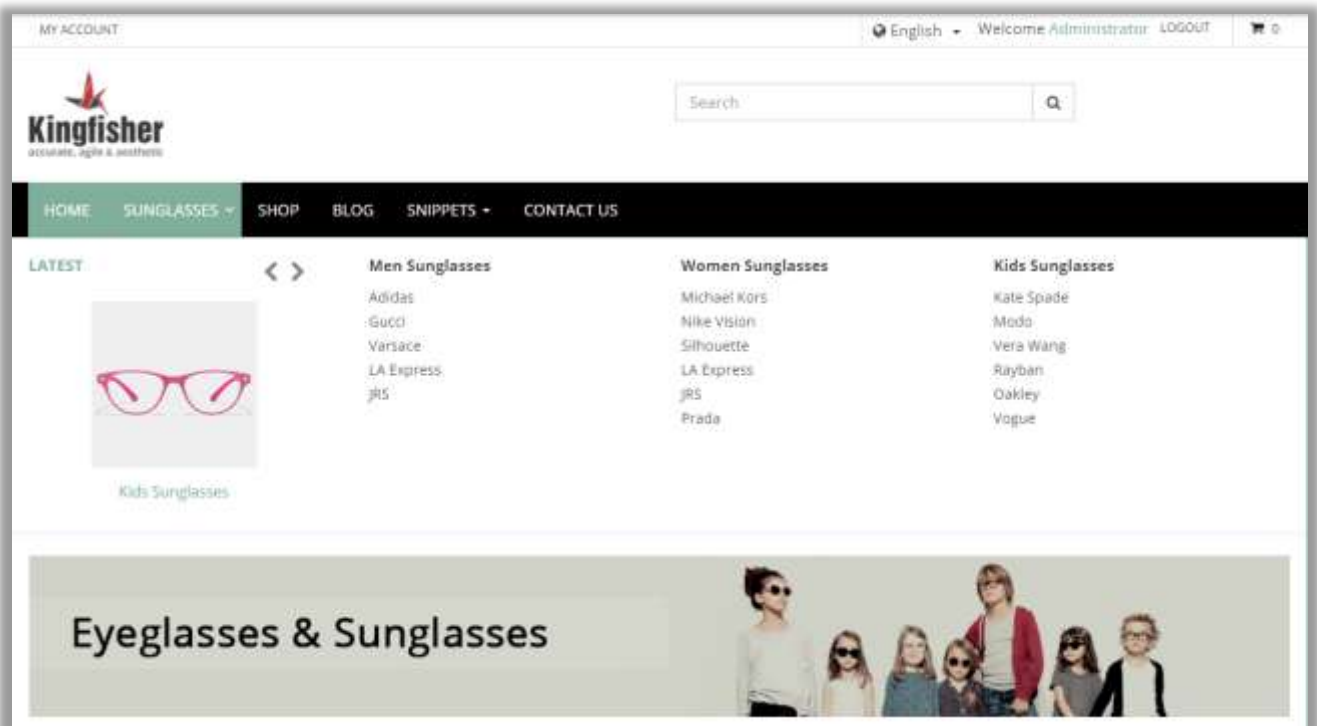

- Click on **'Customize'** to customize Style, Background and Color of the snippet. You can Move, Copy and Delete the snippet from here.

Mega Menu Configuration

- Mega Menu is dynamic menu. You can add product category to it.
- A Mega Menu is used to show selected product categories to navigation so it will create great navigation experience for a user.
- User can manage up to two level navigation in mega menu.

- **Advance Mega Menu Settings**
- Go to **Website -> Configuration -> Pages**. Now you can either select a page or create a new page for creating a mega menu for it.

- To create mega menu for a new page, click on **'Create'** Button. Now enter the relevant page details and click on **'Add an Item'** link under **'Related Menu Items'** to create the mega menu.
- There you will have options to add website, name of menu, URL for menu, Option to open menu in new window, Parent Menu & select whether the new menu is mega menu or not.

A screenshot of the 'Create Related Menus' dialog box. It contains the following fields and options:

- Website:** Website localhost (with a link icon)
- Menu:** Mega Menu
- Url:** (empty text field)
- New Window:** ☒
- Parent Menu:** Top Menu (with a link icon)
- Is megamenu...?:** ☐

At the bottom, there are three buttons: 'SAVE & CLOSE', 'SAVE & NEW', and 'DISCARD'.

Note:

- Select **'Top Menu'** option in **'Parent Menu'**.
- To configure and manage the Megamenu kindly activate the developer mode (with assets) from **'Settings'** module.

Mega Menu Configuration

- Select **Is megamenu...?** Option to create mega menu & give configurations as required.
- **Megamenu View Type:** Select the type of view in which megamenu is to be displayed. It can be displayed in following ways:
 - **Category Megamenu**
 - **Pages Megamenu**

The screenshot shows a modal window titled "Create Related Menus". It contains the following fields and controls:

- Website:** A dropdown menu showing "Website localhost" with a refresh icon.
- Menu:** A text input field containing "Mega Menu".
- Url:** An empty text input field.
- New Window:** An unchecked checkbox.
- Parent Menu:** A dropdown menu showing "Top Menu" with a refresh icon.
- Is megamenu...?:** A checked checkbox.
- Megamenu View Type:** A dropdown menu with two options: "Category Megamenu" (highlighted in blue) and "Pages Megamenu".

At the bottom of the dialog are three buttons: "SAVE & CLOSE" (in a teal box), "SAVE & NEW" (in a teal box), and "DISCARD" (in a light grey box).

- If you select Pages Mega Menu from Megamenu View Type, you also need to set the size of mega menu from the following:
 - **Megamenu Size:** Select the size of mega menu.
- And on selecting Category Mega Menu from Megamenu View Type following options are to be configured:
 - **Mega Menu Type:** Choose the number of columns needed in the Megamenu.
